## TECHNICAL SKILLS

---

HTML, CSS, JavaScript, React.js, Context API, React Router, RESTful APIs, Material-UI, Tailwind CSS, SQL, Git, VS Code, Jira

## WORK EXPERIENCE

---

### Frontend Developer (React) - Cognizant

October 2021 – March 2024

*SwissRe Digitally Assisted Underwriting Application*

- Developed a comprehensive tool, **Digitally Assisted Underwriting Application**, utilizing **React** for streamlined underwriting processes.
- Developed and implemented a **Comments Section** React component enhancing transparency of underwriters' decisions.
- Developed a **re-usable Modal component** to display case information with the help of **RESTful APIs**.
- Utilized modern CSS techniques such as **Flexbox** and **Grid** to create a consistent fluid and adaptable layout.
- Collaborated effectively with **UX/UI designers** and **back-end developers** in an **Agile Environment**, facilitating efficient workflows and timely delivery of application features.
- Conducted **User Training** sessions to explain the application's features and functionalities to the underwriters.

*SwissRe Retention Optimizer*

- **Retention Optimizer** application is a comprehensive, data-driven tool designed to enhance insurance customer retention and profitability.
- Undertook **CSS-focused** tasks, leading the creation of a responsive and adaptable layout to optimize user experience.
- Developed **user-friendly UI elements** for "Clear Allocations" and "Allocate Policies" actions with **React Components**.
- Addressed UI bugs and performed code refactoring tasks to improve application **performance and maintainability**, adhering to best coding practices.
- Maintained robust **code documentation** to support collaboration and facilitate future development efforts.

## PROJECTS

---

**Fithub** | *React.js, React Router, JavaScript, Material-UI, Axios*

June 2023

- Developed a web app using React and Material-UI components for styling.
- Implemented React-Router for smooth navigation, enhancing user experience.
- Designed Home Page with hero banner, search component, and exercise list from external API using Axios.
- Incorporated a search component for filtering exercises by body parts.
- Applied loaders for improved user experience during data fetching.
- Ensured responsive design with MUI's Box and Stack components for consistent layout on various screens.

## EDUCATION

---

**Heritage Institute of Technology**

Kolkata, India

*Bachelor of Technology*

*2017 – 2021*
