TECHNICAL SKILLS

Primary: HTML, CSS, JavaScript, React.js, Redux, Context API, React Router, RESTful APIs

Secondary: Material-UI, Tailwind CSS, MySQL, Jira, Git, GitHub

WORK EXPERIENCE

Frontend Developer - CTS Corp.

October 2021 – March 2024

SwissRe Digitally Assisted Underwriting Application

- Developed a comprehensive tool using **React.js** and **Redux** to streamline underwriting processes
- Implemented a **Comments Section** component to enhance transparency in underwriters' decisions.
- Created a **re-usable Modal component** to display case information utilizing **REST APIs**.
- Utilized **CSS Modules** for consistent, adaptable layouts.
- Worked on the development of a user-friendly interface for recording the decisions of the underwriters.
- Collaborated with UX/UI designers and backend developers in an **Agile Environment**, using SCRUM methodologies
- Conducted User Training sessions to explain the application's features and functionalities to the underwriters.

SwissRe Retention Optimizer

- **Retention Optimizer** application is a comprehensive, data-driven tool designed to enhance insurance customer retention and profitability.
- Developed **user-friendly UI elements** for "Clear Allocations" and "Allocate Policies" actions with **React.js Components**.
- Addressed UI bugs and performed code refactoring tasks to improve application **performance and maintainability**, adhering to best coding practices.
- Maintained **code documentation** for collaboration and future development.

PROJECTS

RupeeTrack | *React.js, React Router, CSS, react-toastify* | [Link](#)

May 2024

- Implemented a responsive and intuitive UI using **React.js**, ensuring seamless user interactions.
- Utilized **React Router** for efficient navigation and dynamic routing, enhancing the user experience.
- Enabled users to add, view, and delete expenses with real-time updates and data persistence via **localStorage**.
- Applied custom **CSS** and integrated third-party libraries like **react-toastify** for enhanced UI/UX.

Fithub | *React.js, React Router, JavaScript, Material-UI, Axios* | [Link](#)

June 2023

- Developed a web app using **React.js** and **Material-UI** components for styling.
- Implemented **React-Router** for smooth navigation and **Context API** for state management.
- Designed Home Page with hero banner, search component and exercise list.
- Incorporated a **search component** for filtering exercises by body parts.
- Fetched data from an external API using **fetch** method with **Axios** and integrated results into the application.
- Ensured responsive design with MUI's Box and Stack components for consistent layout on various screens.

EDUCATION

Heritage Institute of Technology

Kolkata, India

Bachelor of Technology

2017 – 2021
